AWARD WINNING LYNTON MOTUS AX BY DEKA

The Code of Experience

Heritage House, 50 Chorley New Road, Bolton, Greater Manchester, BL1 4AP. Tel: 01204 528884

## Gold-Standard Results

Here at Evolve Skin Clinic in Bolton we only use award winning equipment to treat our clients, ensuring the safest and most clinically effective treatments possible. With this in mind, we are delighted to announce that we have recently added the world's most exciting development in 'pain-free' laser hair removal technology: The Motus by DEKA.

## New Specialist Moveo Technology

This new and unique laser hair removal device uses a specialist new technology: Moveo. This advanced technology allows us to use the exact type of laser considered by dermatologists as "most effective in laser hair removal treatments" (Alexandrite) but in a new 'pain-free' mode!

## Award-Winning, Medical-Grade Equipment

Traditionally, despite the Alexandrite laser being the most effective for laser hair removal, it can be a quite an uncomfortable treatment compared to other alternatives. Our new Motus Moveo Technology helps overcome the uncomfortable aspect of this treatment by changing the way the laser is reflected by the skin, allowing all our clients to receive 'pain-free' laser hair removal treatment, with the gold-standard results of a traditional Alexandrite laser.

Together with our revolutionary new laser technology, all our operators here at Evolve Skin Clinic have received comprehensive theory and practical based training by the UK's No.1 supplier & manufacturer: Lynton Lasers Ltd.

# Frequently Asked Questions

## Why is it unique?

At Lynton, we have an extraordinary device, the award winning Motus AX, that delivers the world's first Alexandrite laser in the 'Pain-Free' mode and that is FDA approved for use on all skin types. Traditionally, the Alexandrite laser has only ever been safe to use on skin types 1 – 3 due to its exceptional melanin absorption capability's, making it unsafe to use on any skin of colour due to increased risk of adverse reactions. The Motus AX overcomes these restrictions, providing the advantages of 'Pain-Free' laser hair removal but with the unsurpassed clinical efficacy and results associated with the Alexandrite laser.

## How does it work?

Using light circular movements at a reduced power allows the Alexandrite laser to work at 100% efficiency, therefore avoiding wasted energy. This unique feature offers laser practitioners the advantages of 'pain-free' laser hair removal but with the unsurpassed clinical efficacy and results associated with the Alexandrite, on all skin types.

## What are the benefits?

The Motus AX is the world's first and only pain-free laser hair removal platform to deliver the gold-standard laser for melanin absorption: PRIMARY Alexandrite, for ALL skin types. For the first time, practitioners can now treat every client with this specialist FDA approved Alexandrite laser, regardless of skin type. This helps users overcome the previous restrictions and risks associated with treating darker skin types with an Alexandrite laser.

A unique 20mm contact-cooled sapphire tip combined with optimum peak powers (6,000W) and ultrashort pulse durations down to 2ms, aid the Motus AX Alexandrite laser when treating more challenging fine and fair hair.
